Motivated and dedicated Front-end developer with a strong foundation in programming principles.Proficient in HTML5, CSS3, and JavaScript, Java, SQL with hands-on experience in frameworks and libraries like Bootstrap. Eager to contribute to software development projects

---

PROJECT

Project - 1

YouTube Clone Website

(HTML, CSS, FlexBox, Grid Layout)

- Developed a responsive YouTube clone using **HTML** and **CSS** to replicate the core user interface of the YouTube platform. The project demonstrates proficiency in web design, layout structuring, and styling with modern CSS techniques.
- Designed a grid-based structure for displaying video thumbnails with titles and descriptions.
- Created a sticky top navigation bar with a search field, logo, and user profile icon.
- Used **flexbox** and **grid** for alignment, hover effects for interactivity, and variables for consistent styling.

Project - 2

E-Commerce Web Application

(HTML, CSS, Media Queries, Javascript)

- Developed interactive and responsive UI components using **HTML, CSS, and JavaScript** to provide an intuitive shopping experience across devices.
- The project focused on **responsive design,** dynamic interactivity, and user-friendly navigation to ensure accessibility across all devices.
- Enabled search filtering features using JavaScript for better product discoverability.Implemented a sticky header for easy access to menu options.

SOFT SKILLS

1. **Communication**: Effective communication to facilitate collaboration and training
2. **Teamwork**: Strong team player with a history of successful group contributions.
3. **Adaptability**: Quick to adjust and thrive in changing environments.
4. **Problem-Solving**: Proactive in identifying and resolving comples issues.
